WHAT'S NEW
DAP RELEASE 1.4.21

The DAP update for Release 1.4.21 is described below. The instructions regarding the changes are included in this document (see Pages 2-4).

Mortgage Credit

♦ The time associated with the copy assignment function in Mortgage Credit has been significantly reduced.

♦ Link to Valuation Assignment: The user is now able to change the association of the Valuation and Mortgage Credit assignments before the Mortgage Credit assignment is closed. The process to change the association after Mortgage Credit has been closed remains the same.

Link Valuation Assignments

You must first link a completed Valuation assignment to your Mortgage Credit assignment before you can begin processing Project Analysis. This is done on the Valuation Assignment tab (Figure 1). If you find that you have a need to link to a different Valuation assignment while the Mortgage Credit assignment is open, you are able to change the association of the two assignments. However, once the Mortgage Credit assignment has been closed and you need to make a change, a new Mortgage Credit assignment is required. Once the new assignment has been created, you can link to a different Valuation assignment. The copy assignment feature (see Section 7.7.5) may be used to eliminate entering information again.

Figure 1. Mortgage Credit Main Menu - Valuation Assignment Tab

To link a Valuation assignment:

1. From the **Mortgage Credit Main Menu** window, select the General tab.

2. Select the Project Analysis radio button, click on [OK], and a warning message (Figure 2) displays.
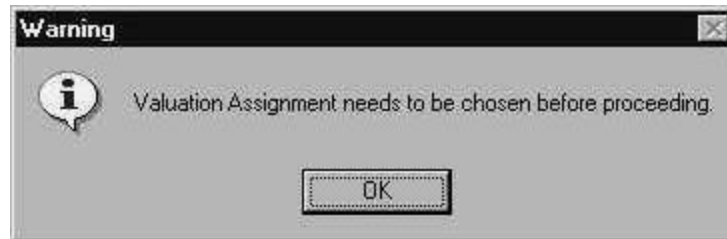

Figure 2. Warning Window

3. Click on [OK], and the Valuation Assignment tab displays.

4. Select the Valuation Assignment you want to link to the projects. Click on [**Link to Valuation Assignment**], and a confirmation window (Figure 3) displays.
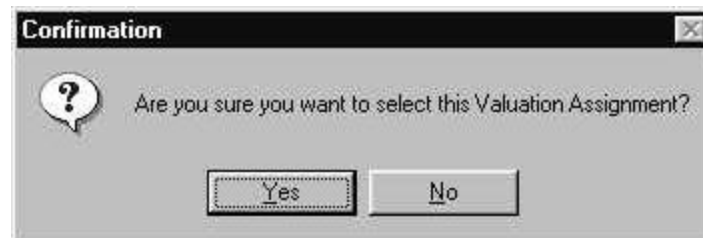

Figure 3. Confirmation Window

5. Click on [Yes], and you return to the General tab of the **Mortgage Credit Main Menu** window.

To link a different Valuation assignment:

1. From the **Mortgage Credit Main Menu** window, select the General tab.

2. Click on the Valuation Assignment tab.

3. Highlight the Valuation assignment you wish to link to the project.

4. Click on **Link to Valuation Assignment**, and a confirmation window (Figure 4) displays.
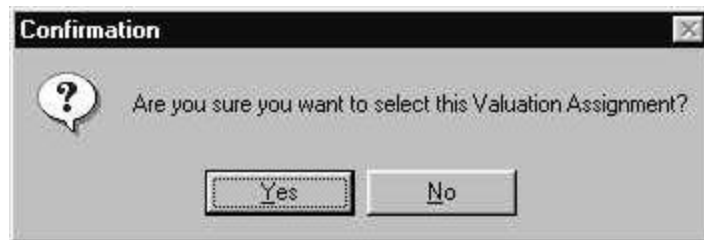

Figure 4. Confirmation Window

5. Click on **Yes**, and the system recalculates all Project analysis data. A message displays (Figure 5) informing you the re-link was successful and to which version you are now linked.

Figure 5. Information Window

5. Click on **OK**, and you return to the General tab of the **Mortgage Credit Main Menu** window.

To view a Valuation assignment:

1. From the **Mortgage Credit Main Menu** window, select the Valuation Assignment tab.

2. Select the assignment you want to view

3. Click on **View Valuation Assignment**, and the Valuation Main Menu displays.

4. From the **File** menu, select **Close** and you are returned to the Valuation Assignment tab.

✎ *Note: From the Valuation subsystem, you are able to view A&E and Cost assignments associated with the project.*
